### **District 04 Mobility Performance Report**

### 2018 Fourth Quarter

### **EXECUTIVE SUMMARY**

### Overview

Caltrans District 4 is comprised of nine counties that border the San Francisco Bay:
Alameda (ALA), Contra Costa (CC), Marin (MRN), Napa (NAP), San Francisco (SF), San
Mateo (SM), Santa Clara (SCL), Solano (SOL), and Sonoma (SON) Counties. Although these
are urban counties, they do contain a large amount of sparsely populated land.

The Mobility Performance quarterly analysis compares information with over a year ago and over last quarter in the following performance measures:

- Vehicle Miles of Travel (VMT)
- Vehicle Hours of Delay (VHD)
- Lost Lane Miles (equivalent lost productivity)
- o Detector Health

This information is based on data collected every day of the quarter, twenty—four hours a day, by automated vehicle detector stations deployed on urban-area freeways where congestion is regularly experienced. The MPR presents congestion information at two speed thresholds: delay from vehicles traveling below 35 miles per hour (mph), and delay from vehicles traveling below 60 mph. The delay at the 35mph threshold represents severe congestion while delay at 60 mph represents all congestion, both light and heavy. These thresholds are set by Caltrans and are based upon engineering experience and District input.

### **FINDINGS**

In the fourth quarter, total delay equaled 10.3 million VHD at the 35mph speed threshold, and 19.7 million VHD at the 60mph threshold. Compared to the same quarter the year before, there was an 11.4 percent decrease in 35mph total quarterly delay and 8.2 percent decrease in 60mph total quarterly delay. This decrease may be due to the 2070 controllers installed at vehicle detector stations that have had software issues causing lower than existing volumes. The software is under investigation. The VHD decrease also could be due to a 1 percent decrease in the number of good working detector that are no longer able to capture the congestion.

The average weekday delay experienced in this quarter was approximately 139 thousand VHD at 35 mph, and 268 thousand VHD at 60 mph. Thursday was the most congested day of the week. This was a change from Wednesday being the most congested day in the same quarter a year ago and the prior quarter.

Alameda County with 3.3 million vehicle hours of total delay at 35mph during the fourth quarter was the most congested county in the District. This county experienced the largest magnitude decreases; a 19.2 percent decrease from a year ago and a 11.9 percent decrease from the previous quarter.

Santa Clara County with 2.7 million vehicle hours of total delay at 35 mph was second most congested county in the District.
